

Image Web Service Workflows

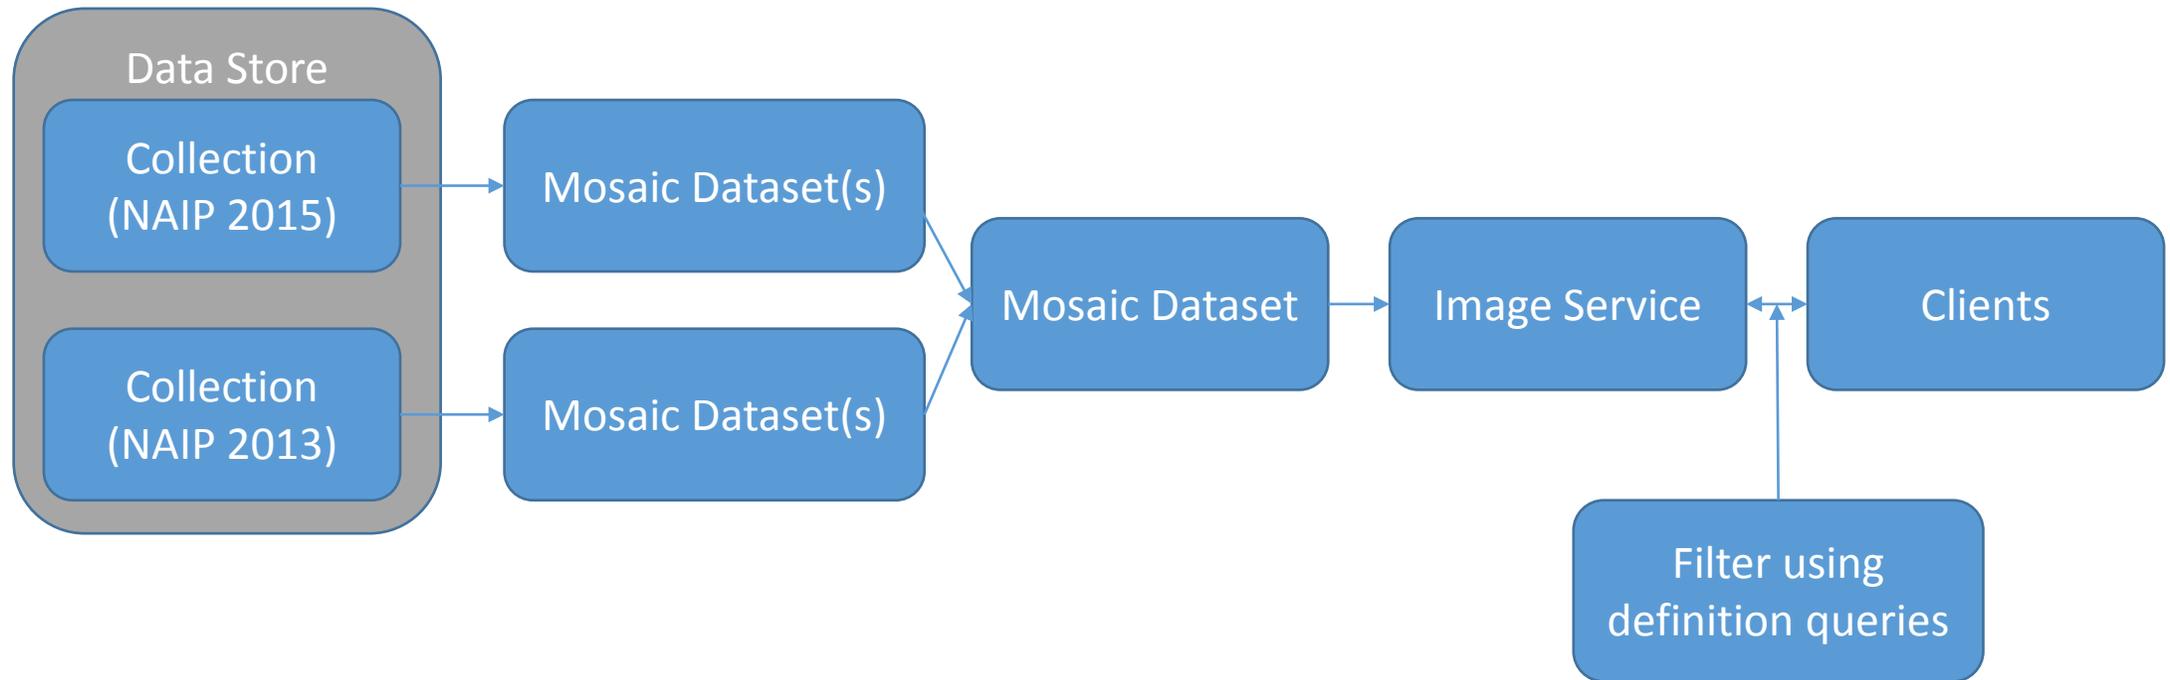

Bruce Godfrey
University of Idaho Library

Current Workflow

Proposed Workflow

Improve management, discovery, and flexibility

What Image Service Fields Should Be Included?

- Year
- FirstDate
- LastDate
- Dataset_ID
 - (0=NAIP 2004, 1=NAIP 2009, etc.)
- Resolution
- Download_URL
- Metadata_URL
- Rectification
 - (0=geo, 1=ortho)
- Product_Definition
 - (0=RGB, 1=RGBI, etc.)[#_of_Bands]
- Leaf_Status
 - (0=Unk, 1=Leaf_On, 2=Leaf_Off)
- Source
 - (0=Unk, 1=USDA, 2=USGS, 3=IDWR, etc.)
- Sensor (digital or film camera name)
- Constraints (none, licensed)
- imageryType (satellite, aerial)

Asking TWG Members:

- Does single service perform faster/slower than individual services?
- What fields that should be included for filtering?
