\* Cost share estimates are for planning purposes only and are subject to change.

**Minimum partnership contribution** refers to the minimum cost share amount required from State and local funding and does not guarantee full state coverage.

**Full State partnership contribution** refers to the amount needed to complete full State coverage. The optimum situation would be for Federal partnerships at the National level to cover this amount, independent of State partnership contribution. However, to guarantee full State coverage, State partner consortiums can fund this amount.
