

STRUCTURES NOTES

Subcommittee of the Public Safety TWG

1. PHOTO attribute to be changed from *raster/blob* to STRING, 250, and store <http://...URLs>
2. Should INSIDE harvest concatenated address (some sources don't parse)?
 - a. Implementing a parsing script would be impractical given the unique nature of data from one steward to another. Bruce will look into the feasibility of harvesting the concatenated field for the "FULL_ADDRESS" field.
3. Tricky APA Code situations
 - a. Example: City Hall is also Fire station
 - i. Some might consider putting two points (even though they may have the same address) and classify them accordingly. Others may want to only manage points with unique addresses.
 - ii. Conclusion: These can be maintained either way, as long as the APA_CODE is populated with priority given to one of the six USGS categories.
 - iii. Check with Julie and see if this will work.
4. APA Code Subgroup
 - a. Bill agreed to facilitate new APA codes, and keep a list of
 - i. Get Julie's input as needed
5. STRUCTURES outreach YouTube production.
6. Charter
 - a. Signatures from each participant required.
7. Bruce reviewed new INSIDE Idaho website; Reviewed log system for data contributors.

IN ATTENDANCE:

- Bill Reynolds
- Bruce Godfrey
- Dan Spinosa
- Eric Smith
