# Public Safety TWG Meeting 11/2/2022

Attendance:

Bill Reynolds, Nez Perce County
Pam Bond, State ITS
Wilma Robertson, State ITS
Angel Barnett, Nez Perce County
Debra Dreger, Boundary County
Michael Miller, ITD
Craig Tarter, City of Nampa
Angela Vanderpas, City of Lewiston
Abigail Stahl, Bonner County
Clay Engel, Bonner County

Bill discussed revisions made to the NG911 GIS Data Standards:

- Updates because of revised NENA standard approved in September.
- Data characteristic information missing in a couple of the standards.
- Minor updates just for consistency in the attribute table.
- Addition of 'DOM' to some fields that it was missing from.

Pam brought up question about having Emergency Service Boundaries in one dataset or split out by type (Fire, Law, EMS, etc.).  Bill suggested this be left up to each county as the choice may be driven by the needs of their CAD vendor.

Craig Tarter asked if there is a reason the standard uses prefixes instead of post-types of NGUID.  Pam and Angel commented on this, mostly because it seems that is what the NENA Data Model uses.

Wilma asked if this needs to go to IGC-EC as an information item or an action item to get them re-approved. Leaning towards just having it on the agenda as an information item.  Bill will discuss more with Wilma.

Bill asked if anyone would like to be involved with creating a Best Practices document for NG911.  Wilma mentioned that they RFP for the validation software solution included authoring best practices. Working together with the vendor shouldn't make this such a heavy lift.

ACTION ITEM: Bill send email to Katherine and Wilma that you'd like to add this an information item to the agenda.  Submit two documents – one with the clean-up (changes made) version and the readline version.
