

Cadastral Technical Working Group Meeting 9/24/2024

Tuesday, September 24, 2024 3:00 PM

Meeting Hosted by Bradley Bean

Attendees: Bradley Bean, Chris Haines, Mark Wasdahl

Update on Progress for Improving PLSS for Idaho:

Brad with State of Idaho ITS is working on projecting and preparing the MCPD data points in Idaho to use in starting to change the BLM PLSS Parcel Fabric. Once that is complete he will start along county lines first with this. The virtual machine is up and running for use by Brad and Chris Haines.

Open Discussion:

Question (Mark Wasdahl): Can we utilize other surveys paid for by other state agencies (like ITD) as long as we own the contents of the survey?

Answer (Bradley Bean): I would have to check, but I don't see why not. That would be a great next step once we get through the MCPD and IDL points, as long as everything is legal and approved.

Action Items:

Verify the answer to the above question. Work on a standard for the PLSS to get it nominated.

Potential Topics for Future Meetings:

Review Attributes for a standard for the dataset.

Next Meeting:

11/19/2024 from 3-4pm

Questions?:

Contact: Robin Dunn - rdunn@idl.idaho.gov, Bradley Bean - bradley.bean@its.idaho.gov
