Link to Metadata of Proposed Framework Dataset:

Metadata can be viewed [here](#).

Authoritative Source(s) Description: Various lidar vendors collect and process the data. There is no Statute that requires this source to create this data.

Link to Data Exchange Standard: <https://ita.idaho.gov/psg/s4247.pdf>

Trusted Source Description:

Please attach copies of the agreements between Authoritative Source(s) and Trusted Source.

Minimum Scale of Dataset:

Please describe the proposed maintenance schedule for the dataset: Patchwork addition to dataset by ISU's GIS TReC as additional datasets are collected and approved for public dissemination by collecting agency (e.g., USGS, FEMA, counties).

If this dataset is not a statewide coverage, please describe the methodology for developing or incorporating other data to make a statewide coverage: Ongoing efforts in support of Idaho's Statewide Lidar Plan (v1.1, 2018), led by community collaboration and supported via mandates of the USGS 3DEP program, as well as FEMA, USDA, and other agencies to acquire lidar data for their specific interests.
