Trusted Source Description: Parcel data is created by the 44 different counties of Idaho. Idaho Code 63-209 Assessor's Plat Record

Please attach copies of the agreements between Authoritative Source(s) and Trusted Source.

Minimum Scale of Dataset: 1:5,000

Please describe the proposed maintenance schedule for the dataset: Parcel data will be updated monthly upon completion of automation. Then after it will be updated when ITS receives updates.

If this dataset is not a statewide coverage, please describe the methodology for developing or incorporating other data to make a statewide coverage: The Office of Information Technology Services is working with counties to get their parcel data and then it is aggregated by our office to be in a single Idaho Parcel layer. ITS is undergoing map updates, working toward statewide coverage.
