

Parcel Sharing Workflow

ITS Collects,
Standardizes,
Aggregates and
Publishes Parcel Data

Data sharing agreement between Counties and ITS determining what data ITS can share with private and public agencies

Data Product License Agreement between ITS and public agency that determines how parcel data can be used

Public

Public Agency A

Public Agency B

University A

- Will have fewer parcels and attributes than data shared with public agencies
- Users need to accept disclaimer before using data

Data availability depends on what a County is willing to share
